

Key Investor Information

This document provides you with key investor information about the Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Castellain Value Fund (the “Fund”)

A sub-fund of Castellain ICAV. The Manager is KBA Consulting Management Limited (the “Manager”).

Class A GBP (ISIN: IE00BD5DLZ64)

Objectives and Investment Policy

The investment objective of the Fund is to achieve growth in the value of its assets in the medium to long-term.

The Fund will seek to achieve this primarily by investing in equities issued by companies which are listed or traded on UK and continental European markets.

The Fund will invest in companies with significant asset backing. Examples of such companies include Real Estate Investment Trusts (REITs), investment trusts, investment companies and holding companies.

The Fund may also seek to take short positions, through financial derivatives (“FDI”), in the aforementioned companies. These short positions may be used for investment purposes or for hedging purposes.

The Fund does not expect to invest more than 20% of its assets in short positions.

The objectives and policies of the Fund are not constrained by reference to any benchmark index and the Investment Manager has discretion in its choices of investments. The Fund is actively managed, and the FTSE 100 Total Return* benchmark details are provided for comparative purposes only.

Where the Investment Manager considers it appropriate, the Fund may invest up to 100% of its assets in cash and cash equivalents.

You can buy and sell shares in the Fund twice a month.

Dividends will not be distributed on your Class A GBP Shares.

Please read the Prospectus for more information about the Fund. It is available at www.cascap.co.uk

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or a guarantee. The lowest category (i.e. category 1) does not mean a risk-free investment.

The Fund is in category 5 due to the rise and fall of its price over the last five years.

Investment in the Fund carries with it a degree of risk including, but not limited to, the risks described in the “Investment Risks” section of the Prospectus. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and the Supplement carefully and consult with

their professional advisers before making an application for Shares. There can be no assurance that the Fund will achieve its investment objective.

The following are additional risks which are materially relevant to the Fund which may not be adequately captured by the risk and reward indicator:

- The Fund invests in shares of companies and the value of these shares and the income from them can go down as well as up due to changes in the company, its industry, and the economy in which it operates.
- In certain market conditions some assets in the Fund may be less liquid and therefore more difficult to sell at their true value or in a timely manner.
- The Fund may use FDI for investment purposes, which may result in the Fund being leveraged and may result in a higher level of volatility in the value of the Fund.

Past Performance

The Fund was originally launched in Jersey in March 2009. It migrated to Ireland on 3 April 2018 and was authorised as a UCITS. The performance prior to 3 April 2018 was achieved while it was domiciled in Jersey, before it was authorised as a UCITS. However the investment policy, strategy and portfolio composition of the Fund were not altered as a consequence of the migration, the Investment Manager of the Fund remained the same, and the board of the Fund is satisfied that the past performance data is accurate.

The figures for this share class are based on total return (i.e. capital and income) in GBP.

Please be aware that past performance is not a reliable indicator of future results.
